PROFESSIONAL SUMMARY

Recent Computer Science graduate seeking a software engineering role with a passion for building functional, extensible applications. Disciplined worker with a positive attitude who focuses on learning and bringing flexible skills with multiple languages to a team.

SKILLS

- Object-Oriented Programming in C++
- Python and Flask
- Javascript / Typescript
- Web development with React
- Docker
- Proficiency with LangChain
- Experience with teamwork and leadership
- Exceptional interpersonal communication

RELEVANT WORK EXPERIENCE

TECHNICAL COURSE SUPPORT SPECIALIST

Portland State University   Mar 2021 - June 2024

- Effectively communicated computer science and OOP concepts
- Facilitated computer science labs and student programming events
- Advised students on designing and debugging programming assignments

CAPSTONE TEAM LEAD

Portland State University   Feb 2023 - June 2023

- Directed team of software engineering students on a large-scale ticketing system
- Improved functionality and readability of a substantial codebase
- Interfaced with sponsor and managed implementation of requirements
- Demonstrated valuable leadership and technical development skills

PROJECTS

- Image Text Extractor
- Security LLM Agent
- Sorting Algorithm Visualization
